SDG 6

Clean Water and Sanitation

6.4 Water reuse

SDG 6 – Indicator 6.4.2 - Water reuse measurement

Total Reused and Recycled Water in Universitas Sriwijaya

The implementation of wastewater recycling technology is an effort that can be made to address water scarcity. This recycling process is also one of the efforts to improve the efficiency of clean water use, so measuring the amount of recycled water is also necessary. The recycled water can be used for various purposes on campus, such as irrigation of plants and toilets.

Wastewater tank and filtration process
