UNSRI Collaborates with USU in Raising Public Awareness of Water Management

Universitas Sriwijaya (UNSRI) is collaborating with another university in Indonesia, the University of North Sumatra (USU), in an effort to raise public awareness of water management around the Musi River. The main goal of the collaborative activity is to try to overcome the problems of water pollution, water area irregularities, housing arrangements, and natural disasters. With this activity, UNSRI has played a role in national collaboration on water security.
