SDG 6

Clean Water and Sanitation

6.5 Water in the community

SDG 6 – Indicator 6.5.5 - Promoting conscious water usage on campus

UNSRI Active in Promoting Water Usage on Campus

Awareness of water use is important in improving water savings. Conserving water usage is a form of water conservation that can be done by all parties. Universitas Sriwijaya (UNSRI) also plays an active role in promoting conscious water usage on campus. This is done, for example, by placing water-saving stickers in several places on campus. These stickers are expected to raise awareness for those who read and understand them.
